Coordinates (x, y)	8,000-9,000	Government Type	Republic
Population	100 million	Intergalactic Disposition	Earth-1082 is kind with its neighbors and very friendly, Earth-1082 would only be unfriendly if there is a not so nice neighbor.
Terrain	There is mountants, cities, rivers,lakes,ponds, some islands but not by the city.	Primary Race(s)	N/A
Climate	The weather is a mix of hot and cool, so between 60 and 70 degrees with a tiny breeze	Primary Resource/ Technology	The people around use phones but the phones have infinite storage they can order something and it would be right at their door within 1 second and if it's any later they have the right to sue. For their currency they use Bitcoin to buy things.
Size	0.25	Description	Earth-1082 is a calm place and everyone gets a penthouse but the temp is always around 60-70 with a tiny breeze. The bitcoin market crashed 100 years ago but it hasn't ever sense. A Lot people like Bill Gates, Lebron james, etc have visited Earth-1082 but Elon Musk is the only celebrity living right now.
Planetary Wildlife	A bass with wings and has big biceps. Also can breathe on land. This fish can be found in water, or walking on land. Sometimes you can see it flying around and doing fish flexing competitions. And the bass is called bassini		

Dark sword

Druvunus

Dark matter

Rock Steady

Shovelsored

Origin Story: I found this sword in between a weird looking place, I picked it up and I thought it was normal until it started smoking and I dropped it. I put it in my backpack and went back home, and later found out that it has multiple powers.

The Sword is grey with blackish color and with gold sparks in that are tiny. And the purpose is to help get rid of bad guys.

● Fire ability

The sword can turn on fire, and can be very destructive, and can finish the job. And the fire is from Variaxis I had to risk my life to get the fire.

◆ Tornadoes power

The sword can spawn tornadoes, and dystory a lot of things and i had to get it from Druvunus to collect the dark matter to put into the sword.

★ infinite powers

And the rare ability can do alot of things like shoot crystals and it can make you become invisible when holding it.

Chapter One: Introduction

Music started playing as I arrived. My name is Stephen Hancock. I'm from planet Earth-1082, and I want to be a Trillionaire, and to mog Marlon, anyway, life on Earth-1082 is fun, you can do anything like mogging competitions, also everyone owns a penthouse. You also get superpowers. I'm able to shoot webs like Spider-Man, fly, and go invisible, also I aura farm people so bad they fall in love. And I do stocks so I can gain money to reach my dream of being a trillionaire, and how I do that is I go on my setup or my Futuristic phone to put money into bitcoin or other stock markets. I wait till the stock thing goes down, that's when I put around 100k in, then soon it skyrockets, I take out my money, and it doubles to 200k, and the other stock markets I put 10k in, and it doubles to 20k. I also dream about owning a thousand hellcats. I already have 383. Another thing is, I love to play Call of Duty. I put around one thousand dollars into the game, but anyway, that's all about me and my favorite things to do.

Chapter Two : The mystery phone call

I fear losing all of my aura and going broke. And I haven't mogged Marlon, and I have been waiting to meet him so I can do the mogging contest. Then my phone starts ringing. I pick it up. The caller's name is unknown, and they say I need to go to Druvunus. I heard that Druvunus is not a very chill planet, and they like to fight, but I have a plan, so I don't get hurt or possibly die. I get on a rocket ship and start heading over there. I land, and I get out to see a weird-looking gremlin thing that says, "Hi, my name is Lazer." My name is Stephen Hancock, and I say, "Why do I need to come here?" Lazer says, "I'm coming with you for your adventure. My owner said I need to help you." "Ok.... I don't need help, though," I say Lazer says, "You will when you go to Lavasri." What is a Lavasri? I look it up, and it's a planet with flying cars, and it has lava and fire everywhere, and they don't seem like nice people. I say to Lazer, "Let's get in my rocket ship and head back to my planet." So while we are heading to my planet. I ask Lazer, "So what powers do you have? Can you go invisible or like get super strength or something like that?" Lazer says, "Something like that, but none of what you listed, I can shoot lasers out of my eyes." "Whoa, that's cool, do you use them a lot or only when there's a fight?" I say, "Usually during fights," Lazer says

Chapter Three: The start of the adventure

We arrive, and I say to Lazer, " This is Earth-1082. Earth-1082 is the planet I'm from, and where I live currently. I say to Lazer, "We have flying bass with biceps, and the bass can talk and walk outside of water and do bass flexing competitions."Lazer says, " That's really cool. Why can't my planet have something like that?" I take Lazer to my penthouse, and we head into the elevator, and we get onto my floor, and we get into my penthouse. Lazer says, "Wow, this is nice." I say, please don't shoot any lasers in here, please. I will lose my aura and be mogged so hard I can't even be on my own planet. And Lazer says, "Ok, I won't." " I say thank you. I think we should relax, just watch a movie, and get something to eat. Does that sound alright?" Lazer says, "Yeah, that's alright." Ok, I will order some KFC, and while I do that, find a movie. After eating, I say good night to Lazer, and I go to my room, do my nightly routine, and go to bed. I go to the living room and see that Lazer ruined my whole couch. So I go out and get another expensive couch to replace my old one, while I'm doing that, I ask some of my neighbors if they know anything about Lavasri. They keep saying "that it's not a nice planet." I tell Lazer, "to get in the rocketship so we can start heading to Lavasri."

Chapter Four: the crash landing

Lazer and I are heading to Lavarsi, and my rocketship breaks down, and we land on this weird-looking planet, and it's full of Chubingtons and Bouning Bao, and I ask where we are, and someone says Planet Chubith. I look around, and I just see a bunch of restaurants. I walk around alone because I told Lazer to stay back, and I'm trying to find any mechanic places so I can repair my rocketship, and I ask someone, and they said no, only restaurants around here. Then I start heading back so I can order some tools to fix my rocketship, so I can start heading to Lavasri so I can try to get rid of them because they are not so kind. I ordered the stuff to help fix my rocketship, and I asked some people if they could help. They all said no, so I had to say I'll include food if you help, and they said bet I pop the engine to see what happened, and my supercharger is fried, so I take it out and order another one because I need to make sure that the whole universe can hear my supercharger, and I get twin turbos, and I have like 83 thousand horsepower now and I can make it to Lavasri faster. So I started working on my engine, and I turned my rocketship on, and it turned on, so I gave everyone food and started my way to Lavasri. I arrive at Lavasri, and it is super hot, and I ask who said they wanted to fight the strongest man comes up to me and says, "I wanted to." I tell Lazer to come out, and Lazer says, "Holy crap, he's tall." And I say, "Yeah, I'm going to need help defeating him."

Chapter Five: The big fight

The tall, big man hits me, and I fall on the ground.

He picks me up, and then Lazer hits him with his laser eyes. He lets go of me. And I say to myself, "Holy, that's what the lasers look like." While I get a quick breather. I get back up to get my dark sword. I spawn a torndo, but that doesn't affect him, so I try my fire ability, but I remember he's made out of fire and lava. So I grab a water bucket and splash him, and there's a tiny moment of silence, and then he yells, then he just hits me with a fireball, so I just splash myself. I find out mid-fight that I have a super rare ability on my sword, and it shoots crystals. I hit him with some crystals, and they just melted. I smacked my head and said, "Well, that was helpful." So I went invisible and snuck around him and hit him with some more water. That made him cool down a bit, so I shot crystals at the part where I got him wet. Then his tiny fire minions started attacking me, so I called for Lazer to help get rid of them. I use my Spider-Man webs to make his hands stuck on the wall, and I started going crazy with my sword and the powers. And he looks like he wants to give up, but won't say it, so I turn around and start walking back to my rocketship. And then I hear him say, "I give up, just help me get out of these webs." I head back to my rocketship to start heading back to my home planet. I get into my rocketship, and I forgot about Lazer. I start looking for Lazer, I call his name, and he says "boo!" I jump so high he starts to laugh, so I say to him, "Let's start heading back."

Chapter Six : The end

I drop Lazer off at his home planet, Druvunus, and we say our last goodbyes. I start heading back to my home planet to rest and relax, but I see my whole living room is messed up, so I smack my head and head back out to get a new couch, TV, and carpet. I get everything and head back home to put everything back together, relax, watch some South Park, and eat food before going to bed and doing my nightly routine. And I wake up, I look around, and everything is the same, and I smack my head and say, "That was all just a dream." So I grab 5 Monsters and drink them, so I have some energy for the day, and I put South Park on again, and after I drink 2 Monsters, I head out to get food and to just drive around, then I remember that I'm going to a drag strip (racing) and I get my most powerful hellcat and start heading to the drag strip and I win every race I did and mogged every car with my aura and my car's aura. Then I call it a day and try to get the same dream, but I didn't, I don't think I'm ever going to get that dream again, so I buy an 8k quality TV to replace my old one, and I go home and watch some more South Park and call it a week. While I'm watching TV, I black out, and I wake up in a jail cell, and I see lava and fire everywhere, and I say to myself, "I already know where I'm at."
