

CERTIFIED DREAMVALE

BIGGER THAN A DREAM

A DREAMVALE STORY BY OLIVER LINDSAY

Name: Peelo Crust
Age: 12 Mock years
Species: Fetchocts
Gender: Male
Home Planet: Fleamock

Personality Traits

- Kind
- Outgoing
- Helpful
- Calm
- Quiet
- Open arms

Abilities

- Flying- able to fly with his two small wings.
- Super Strength- really strong can break a lot of things only used if in danger.

Moral Alignment

Neutral Good

Dream(s)

To be the first one to go big

Fear(s)

Forgotten and not heard of.

Hey, I'm Peelo. My backstory is kinda crazy, so let's get into it. When I was born, I had undersized wings, and my parents thought I couldn't fly, but I managed, and I can now. My next part of my backstory is my family, my family was big with me having 9 siblings, but now it's down to 7. We lost two siblings to a velock, a velock is a spinning water and air mix that picks up everything in its path, and that's what happened to my siblings. One last thing about my backstory is that I'm the best singer in my family and have even performed a few times for our village. My biggest dream is to go big and for everyone to remember me. So that's my backstory.

Fleamock

Nectrix

Healing Honey

Coordinates (x, y)	(15000, 18000)	Government Type	Anarchy
Population	1 billion	Intergalactic Disposition	Our planet inseracts peacefully and helpfully with other planets sending resources if needed.
Terrain	A lot of water grassy and nature made	Primary Race(s)	We have several different races and don't focus on who primarily takes the most we live all together peacefully.
Climate	Always in 50-70 degrees	Primary Resource/ Technology	The primary thing we export is the Healing Honey to planets close my and so planets super far away. Also we get things in return like flowers and new wildlife looking for a peaceful life on our planet. We also trade one more thing neickles they are like a pickle with Healing Honey in them.
Size	0.75	Description	Our planet is a very good planet if you love wildlife and a peaceful area. The history of our planet goes back far of peaceful trading and healing those in need. We have had many plants and animals live here in the past that have moved on to different planets. Also with our nice weather we have fun games competitions and good times all day.
Planetary Wildlife	Common wildlife found on our plant are Nectrixs they pollinate all the plants in nature even trees. Also they give honey to wildlife for free because they over make it. Their honey also has a healing ability for wounds on wildlife.		

Glimmiel

Floura

Sparkleberry

Land Of The Sweetlings

Pinkleberry

Origin Story: The Glimmiel starts with a normal jar of Healing Honey from the planet of Fleamock that the Nectrixes make. Then the planet of Floura sent us some of their Sparkleberries that we then mashed up into a juice to pour into the honey making a purple pink color with sparkles. Then the Land Of The Sweetlings sent us Pinkleberries that then we crumpled up to little flowers in the honey it made the honey almost double the healing power as the normal. So we tested it on animals in the area and all of them said they felt better then ever and we started trading it to other planets now many people use it. That's the origin of the Glimmiel.

Appearance: The appearance of the Glimmiel is a purple pink mix that has little flower crumbs in it. Also it is in a round jar with a bow on the front. In addition the purpose is to heal and give energy to those in need of better health.

● Spickmikes

The common ability is called Spickmikes the Spickmikes will make fevers and colds and any other common sickness go away.

◆ Nelocks

The Neclocks is uncommon but will get rid of sickness that is hurting or will have long effects on the person as long as they exercise.

★ Fleamecs

Rare abilities are called Fleamecs they will bring back 1/10 people or more if the family truly believes has love and hope and put in much effort to help bring them back.

Quitel

Age: 3 Mock years

Species: Quits

Gender: Male

Home Planet: Fleamock

How we Met

The way I ment Quitel was when I was walking down a cool hiking path and found a egg. Then I put the egg in a warm blanket waited a while then Quitel slowly moved out of the egg.

Quitel

Ability #1:

Superspeed Quitel can run at 70 mph and can use his feathers as boosters and reach 90 mph. Also when he goes this speed his eyes sharpen and he can see targets from over 7 miles away.

Ability #2:

Invisibility he can go invisible at anytime and hide in places that no one would expect. But when he goes invisible he sometimes passes out because of all the power it takes.

Superspeed

Chapter One : The Daily

I woke up on the planet of Fleamock, left my little house, and looked at all the pretty sites with flowers and water. Then I went up to one of the local Nectrixs, and he gave me a jar of Healing Honey and Nekiles. I said thank you to him and greeted all my neighbors. All of our houses are made out of mud, leaves, and flowers, and nature rules our lands. I love my planet, but no one has ever been famous from here, and I really want to be the first one. But that's for a later time, I asked one of the Nectrixs to fly me to town for some things. He kindly said yes, and we were off. Everyone on our planet is helpful and kind; there hasn't been any crime ever. We don't even have police.

But with this perfect planet, you have to keep it maintained so all of us have a job at the same time to keep things feed watered. When I got to town, I went to the local store and got everything I needed. On our planet, there are no factories or anything; everything is natural and environmentally friendly. The way we get water and electricity is from the stream that pushes fast water and spins all of our wheels for power and water. When everyone gets to work, we don't really get paid; we kinda get paid by favors and kindness. With everyone kind and everything peaceful, it makes a world of calm. Some other planets were saying to make a government, but we told them if everyone did what they would and stays pecacful its all good. One bad thing we do have on our planet is Velocks, they are like tornadoes with water, that's what's got two of my siblings, but I try not to think about it.

Chapter Two: The Town

After I got everything from the local stores, I asked the Nectrix to take me back, and on the flight back, I ate some nectar and lay back. When I got back home, I saw people handing out two types of berries, and one had sparkles, and one had a flower look, so I took 3 of each and brought them back. When I got back inside, I started experimenting because I thought it would be fun to do. I smashed up the glitter berry, put it in some of my healing, and sprinkled crumbs on the top of the honey. I called it Glimmiel, but that's when I heard my neighbor screaming in pain, so I ran out to find a big cut in his side. So I quickly went to find healing honey, but no one had it, so I grabbed my new version, spread it on the cut, and it healed instantly.

My neighbor and myself couldn't believe it. So we told everyone else to do the same, and we tested it over and over, and it had double the normal healing power. I told the same Nectrix to bring me to town, and he flew me there, and I showed everyone how crazy this new honey is. Everyone was stunned, and I started handing out many bottles to people in my area until I ran out, and we started making more. Soon, I opened my own shop and was doing better than ever, and I also made honey in different flavors for those in need. But then a guy in a long black cloak told me something is waiting in the caves to strike the whole planet. I tried to ask him what he meant, but he ran away, and I didn't get to ask him anything, so I closed up the shop, counted inventory, then went back home on one of the Nectrixes.

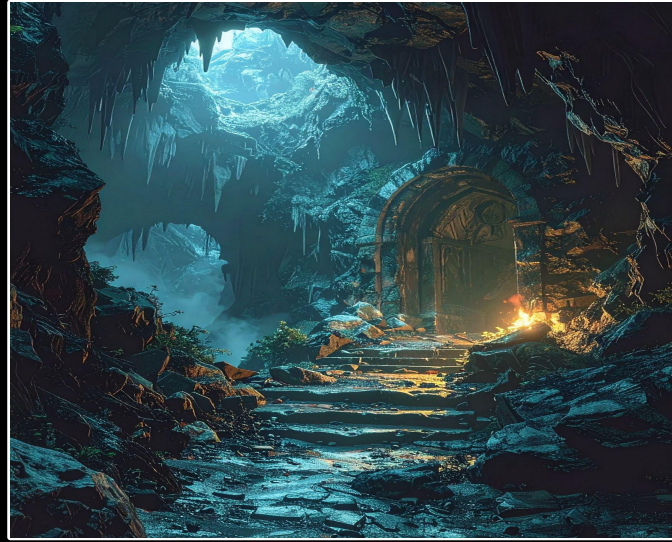

Chapter Three : The Entrance

When I woke up in the morning, I went back home to find 7 jars of honey missing and some decor missing from my walls. I told the other shop owners around me what happened, but they said they didn't see anything, so I thought I had miscounted last night. That's till I remembered what that one guy told me about the cave and something bad's gonna happen, so I decided I was going to walk to it overnight and look around there. I knew it was over a 2-day walk, and there was some weird tales about evil Nectrixes and evil honey, but no one really believed them. When I closed up shop, I took 4 jars of honey and put a sign on my booth that read "will be gone for a while." Then I went on my way, walking away from the town. I sang and walked along till it got dark. I set up the tent that I got from my neighbor across the street and set it up on the side of the trail with a nice warm fire. After I roasted some marshmallows and ate some s'mores, I went to bed. Then I had a nightmare about things walking around my tent, then me falling in the cave, getting trapped forever, and no one could hear me scream. Until I woke up packed up my tent for the second day of a five-day trip.

When I was walking along, I was making really good progress until I tripped and skinned my knee on the dirt, so I washed it off with some water and soap and put the healing honey on it that healed it almost instantly. When walking along, I did have a feeling that something was watching me, but I didn't really mind because everything here on this planet is really friendly and nice to me. After a while, I saw someone ahead of me, they were moving slowly, so I ran up to them and asked what they were doing walking the trail. Then they said "I am the master of the trails and help people find where they need to go" I asked him where the cave his eyes widened and he said "the caves are very dangerous young man there are monsters bigger than the mountains" then I said "those aren't real no way everything on this planet is nice" then he said "if you really wanna go it's down that trail to your left" then I said "thank you" and left to go on the trail. When walking down the trail, I had a weird feeling, but I brushed it off and kept walking along the trail. Until it got dark, so I had to set up camp in an unfamiliar place. I thought I had remembered going down the trail before with some of my family, but I wasn't sure, so I started a fire, made food, and went to sleep.

Chapter Four : The move on

I woke up in a daze and saw that one of my jars of honey was gone, so I looked around camp but couldn't find it, so I thought I had lost it. I kept walking the trail, almost 75 percent done after today. I will make it there. When I was walking down the trail, I saw a little shop, so I went up to see what they had. The owner greeted me and told me to take a seat. I sat there, and he handed me a menu, and it was pretty big, so I asked him to surprise me, and he said, "Okay. When I got the food, he said he picked a fleck pie. He said it was his own creation and that I would like it, so I got to eating and ate the whole thing, then I left, said thank you, and got on my way. When I was walking, I still had the feeling of someone watching me, but I brushed it off and kept going, and a lot alot of progress. That's when I saw a sign left cave right waterfall, so I went right to cool off at the waterfall.

When I walked the trail to the waterfall, there were many markers on how far there was to go. When I arrived at the waterfall, I jumped into the water with a big splash and cleaned off all the bad things. After I was done cleaning off everything, I started my journey back to the cave.e I kept moving and still felt something was watching me, but I brushed it off and continued to the cave. It was getting cold, so I put on a jacket I had and kept going. When I was about 90 percent there, I saw a light in the sky that was moving, but I ignored it and kept go. At at the ,time it was getting dark, and I knew I had a little bit to go, so I ate some honey and went on. When I started seeing checkpoints on how far to go, I slowly slowed down, and then that's when the tiredness hit. I was just about ot fall asleep until it said 2 miles to the cave, so I woke back up and moved a lot faster. It was one mile, then half a mile, and then finally the cave entrance right in front of me.

Chapter Five: The Brawl

When I was in the cave front, I decided to go to sleep. I set up camp, amp, and ate, and then went to bed. When I woke up, it was time to go into the cave, ve so I packed up and went into the cave. It was kinda sc,,ary it was dark, and I heard water dripping all over, so I kept going until anecromancerx came out,t but it looked wrong,g looked evil, so I threw healing honey at it,t and it fell. I kept on into the cave, getting 7 more evil nectixes down and then finally, Sasawitt was true to the giant evil nectrix. I tried throwing honey, but it laughed. I tried almost everything until it threw me against a wall, the wall pinned me to it until I remembered they have a strand on their back that's really sensitive. So I tried to spin around I but its hands and did everything to get out of the nectrix's grip. Then I pulled one of the hairs on her hand and ripped it off. Until she let go of me and screamed. Then it locked eyes with me and threw me against a wall with mighty force. After all of the fighting, I blacked out. When I woke up, I was being carried by two evil nectrixes, but with me still in a daze, I tried to get free.

They grabbed me tighter and said no your not leaving and threw me towards the big evil nectrix again and told me if I could beat the big nectrix, then I could leave and go back with my honey. So I tried flying around her and making moves she would get confused by,, and slowly I took her down, flying around her trying to get to her back,, but she knew what I was trying to do. So I flew in her eyes and made very precise moves that would confuse the mind of the evil nectrix. I flew under her arm, took hair out of all parts of her body, and slowly made her weaker. After over an hour of fighting, we were both getting tired,d but I knew deep down that if I took her out of the forest would restore it to all of its glory. So I did a backflip, kicked her eyes, tore off her antennae, flew under her arm, and finally ripped out the sensitive hair. Then she fell to the ground, and all the evil nectrixes were shocked and flew out of the tunnel.

Chapter Six: The Goal

When I left the cave, I saw all the evil nectrixes turn back normal, and I asked for a ride on one of them, and they agreed. I asked why they turned evil, and they said she put a spell on them, and they were lewd in their because they took their honey. I asked who took the honey, and they said: “Some guy in a black suit with a black cloak took almost the whole hive's honey, so we chased after him and got stuck in the cave and turned evil ever since”. I was shocked by it and told him that the same black-cloaked guy came and took from me too. Then I arrived back at the town, saw that they had set up a parade for me with everyone I had been close with and the whole neighborhood. They also said they were setting up a newspaper to distribute throughout Fleamock. Beat the giant nectrix. But then that's what's noticed, all of my honey was back, and I, indeed, turned famous, and that was my goal in life. After the next few months, I was given special treatment, got a new house, and got more than everyone else, but that's when I noticed I had more than I would ever need, and I also had people visiting from all over. So then I thought of a big idea about giving things away, so I started and used up all of my savings and favors for everyone to live a good life.

Then from on I was loved and everyone had good times, some people even ventured into the forest making shops and fun attractions, and I knew that didn't didnt take down the giant evil nectrix that this planet would be almost gone. When I saw the world turn for the better, I saw the bigger picture. I was not just waiting to be famous; it was to make a change for good and allow many people to do new things and experience things they haven't seen.
